(a) Commitment amount includes reimbursed and non-reimbursed commitments and is GST inclusive.

(b) Total number of people assisted may differ to the sum of people assisted by service type or category. People can be supported by Employment Fund across multiple service types or categories.

(c) Identification of own organisation and related entity spending is based on the ABN of the supplier and varies slightly from the definitions contained in the Workforce Australia Services Deed of Standing Offer 2022-2028. Where the supplier ABN and provider ABN are the same, this will be reported as own organisation, even where the supplier business does not deliver services under the Deed. Related entity spending is where the supplier has been identified by the provider as being a related entity as defined in the Workforce Australia Services Deed of Standing Offer 2022-2028, but the entity but does not share the same ABN. Wage Subsidy category is not subject to own organisation and related entity and is excluded in the calculation of the total percentage for own organisation and related entity.

(d) The Provider Indigenous Mentoring Capability category allows Providers to seek reimbursement from the Employment Fund for services that build the capability of their staff in supporting First Nations people. It is not attributed to individuals, therefore no 'people assisted' measure can be reported and it is excluded in the calculation of the total average commitment amount per person.

(e) Displays Workforce Australia Services Employment Fund wage subsidy commitment amounts.

(f) In order to protect privacy and confidentiality, certain cells within the table have been rounded to the nearest 5. This may result in non-additivity for some totals.
